FOSDEM 2024

Your proposal: Building And Utilizing Purpose-Built GNU/Linux Distribution Images Using Mkosi

Hello, greetings from the Distributions DevRoom organizers at FOSDEM.

After detailed review, we are sorry to inform you that we are rejecting your proposal for FOSDEM 2024. There were too many great proposals this year and the CfP was very competitive. That said, we hope to see you at FOSDEM 2024 as an attendee instead of a speaker.

Your session title: "Building And Utilizing Purpose-Built GNU/Linux Distribution Images Using Mkosi"

However, the Fedora reviewers on the organizer committee felt that your topic would be great for a Fedora Release Party or even the Flock to Fedora conference. Please get in touch with Justin W. Flory in March 2024 to revisit and to share your session more widely with the Fedora community.

Sincerely,

— The Distributions DevRoom organizers
