#### High-level summary and highlights in brief:

##### **7th July 2022**

The attendees were received at the Tower 6 checkpoint where they received authorization and were allowed in the Red Hat premises. Once inside, an introduction to free and open-source software was provided followed by introductions from their ends. Discussions on certain free and open-source technologies such as Wayland, X11, PulseAudio, Pipewire, GNOME, KDE etc. For lunch, the attendees were taken over Taco Bell in the Seasons Mall, where they bonded with each other. Shortly after, they dispersed.

##### **8th July 2022**

The attendees were received at the Tower 6 checkpoint where they received authorization and were allowed in the Red Hat premises. With the swags and stickers made available to the attendees, a series of talks/workshops were conducted. The lunch was made available within the Red Hat cafeteria and people took photographs with the swags in the meanwhile. The talks/workshops continued until evening when the attendees left for the dinner at 1441 Pizzeria where they bonded. Shortly after, they dispersed.

#### Historical Background (have we been at this event before, how did we participate):

This is the first iteration of Fedora Hatch.

Booth Traffic Summary (how many visitors, how did people react to swag) :

Not applicable.  
We did not have any booths.

**Strengths  
(what went well)**

1. The food and beverages for the event were made available earlier on.
2. The talks and workshops were delivered great and people were very interested in them.
3. We were able to onboard contributors to a certain set of Fedora Project SIGs teams.

**Opportunities  
(how can we improve for next time)**

1. The variety of food and beverages could have been better than we have had.
2. The timing by when the talks and workshops began got delayed due to rains.
3. The attendance could have been a bit more than the one that we have had.
