

Fedora Badges Revamp Project

Modernizing Legacy Running Infrastructure

Akashdeep Dhar

Senior Software Engineer, Red Hat CLE
Elected Representative, Fedora Mindshare
Representing Member, Fedora Council

FOSS
ASIA

Introductory Gate

পরিচয়ের দ্বার / परिचयात्मक द्वार / ประตูทางเข้า

অবদান / योगदान / การมีส่วนร่วม

CONTRIBUTION

- Be it development, documentation, testing, speaking, designing, organizing or anything else
- Most avenues of contribution will have an associated Fedora Badge to be awarded on an event
- If there is not, it is easy to request for one and it would be made available in a week

লিপিবদ্ধকরণ / अभिलेखन / การบันทึก

RECORDING

- Activities in Fedora Infrastructure leave behind foot prints used for analytics and security
- Fedora Messaging conveys this information to the Datanommer database for safekeeping
- Every single contribution matters as those eventually lead you to passing a condition check

Introductory Gate

পরিচয়ের দ্বার / परिचयात्मक द्वार / ประตูทางเข้า

অভিনন্দন / अभिनंदन / การแสดงความยินดี

FELICITATION

- Based on the condition check, badges get awarded to contributors on a completion
- Regularly scheduled cronjobs run to verify whether it worked or a certain milestone passed
- Alternatively, these badges can be awarded manually or by scanning a linked QR code

উদযাপন / समारोह / การเฉลิมฉลอง

CELEBRATION

- Compare your badges with your friends to have a healthy competition among yourselves
- Contributors feel valued and hence incentivized to step up their activity on getting awarded
- Badges allow for discovering different ways to get involved in Fedora Project community

DIAGRAM

- **Database** stores the achievements of the contributors and the associated metadata
- **Collection** has the artwork designs and the obtaining rules for the associated badges
- **Messages Consumer** listens to the activities to check if any awarding condition satisfied
- **Liberation** is the frontend with which most users and admins would interact with the service
- **Accolades CLI** is the client with which developers and maintainers would interact with it
- **Accolades API** is the REST API that brings all these components together to make a system

Origin Story

উৎপত্তির গল্প / मूल कहानी / เรื่องราวต้นกำเนิด

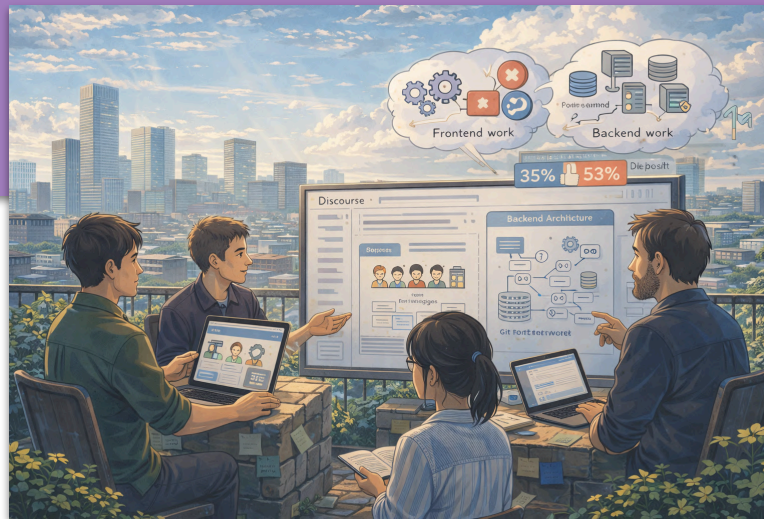

BRAINSTORMING / PRIORITIZATION

2019 - 2020

- User stories were mapped across diverse personas
- Broad stakeholder feedback was accounted for
- Technical limitations slowed down badges activity
- Worked with leadership for contributor engagement
- Discussions paused but shaped the revival efforts
- Artworks progressed but engineering slowed

HOW ABOUT DISCOURSE?

2020 - 2021

- Discussions on integrating with Fedora Discussion
- Mixed reaction ~35% for and ~53% against the idea
- Real challenge lied in the backend, not the frontend
- Discourse could help reduce the UI maintenance
- Badge assets were mirrored for increased visibility
- Limited progress as Infra and Releng was crucial

FULFILLING FORWARD MOMENTUM

2021 - 2022

- Call for participation began under CLE's umbrella
- Contributors joined to stabilize/improve the backend
- Technical investigation done to guide the revamp
- Meetings with clear goals on design and engineering
- Repos moved over to GitLab with refined processes
- Outreachy mentorship around badges artwork

YET ANOTHER FALL

2022-2023

- Renewed progress on structure, naming and arch
- Efforts showed promising momentum on Discourse
- Participation declined with increased pressure
- Other initiatives competed for sustained attention
- Revamp efforts stalled again for the third time
- Pyramid to Flask migration kept the progress rolling

FOUR LEAF CLOVER

2024 - 2025

- Got elected to Fedora Mindshare and Fedora Council
- Chose quiet stealth revival of the technical stack
- Restarted momentum with lightweight exploration
- Folks gradually joined asynchronously and steadily
- Great progress while committing barely ~20% time
- Renewed confidence that the revamp would succeed

TIME TO SHINE

2025-2026

- Finally received the "Dancing With Toshio" badge
- Stack refreshed with PWA frontend - MCP incoming
- Developer deployment made available for testing
- ~75% completion of the project board as of today
- Prioritized in Fedora Mindshare Recognition Service
- Seeking mentees for joining into the journey
